DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 1-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Hamabe et al. (European Publication Number EP 1 237 296 A2), hereinafter Hamabe et al.

Regarding *claims* 1 and 8-10, Hamabe et al. discloses a method of transmitting data over a dedicated physical channel (DPCH) and a High Speed Packet Data Shared Channel (HS-PDSCH), which reads on claimed "first and second channels," the said DPCH having a constant (QoS), which includes data rate, which reads on claimed "predefined grade of service," (see column 2 lines 10-16) and a said HS-PDSCH having a variable grade of service (see column 2 lines 31-36), the method comprising:

- determining a load of a transmit power amplifier. See column 4 lines 3-8;
- determining a share of the load, which is due to the transmission over the first channels. See column 4 lines 4-17;

Art Unit: 2686

determining a difference between a maximum load and the share. See column 4
 lines 9-17;

• controlling the transmission over the second channels on the basis of the difference. See column 4 lines 9-17.

Regarding *claim 2*, according to *claim 1*, Hamabe et al. further discloses wherein the said DPCH are dedicated channels and the said HS-PDSCH are shared channels.

See column 3 lines 52-58.

Regarding *claim 3*, according to *claim 1*, Hamabe et al. further discloses whereby the load is determined by means of a moving average of the load being required to transmit the data over the first and second channels by means of the transmit power amplifier.

Se column 6 lines 55-58 and column 7 lines 1-14.

Regarding *claim 4*, according to *claim 1*, Hamabe et al. further discloses wherein the maximum load being a mean power amplitude (see FIGURE 3), whereby the mean power amplitude is a safety margin below maximum peak power amplitude. See FIGURE 3.

Regarding *claim 5*, according to *claim 1*, Hamabe et al. further discloses wherein determining a share of the load which is due to the transmission over the said HS-PDSCH, whereby the share of the load which is due to the transmission over the said

Art Unit: 2686

DPCH is determined by subtracting the share of the load which is due to the transmission over the HS-PDSCH from the load. See column 4 lines 3-17 and lines 45-58.

Regarding *claim 6*, according to *claim 1*, Hamabe et al. further discloses wherein the control is performed by a controller (14) for the said HS-PDSCH. See column 4 lines 45-58, column 7 lines 54-58 and column 8 lines 1-15.

Regarding *claim* 7, according to *claim* 1, Hamabe et al. further discloses wherein the transmission of data over the said DPCH being scheduled by a scheduler for the said DPCH independently from the scheduler for the said HS-PDSCH. See column 8 lines 1-15.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Randy Peaches whose telephone number is (571) 272-7914. The examiner can normally be reached on Monday - Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Marsha D. Banks-Harold can be reached on (571) 272-7905. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
